

ENTERPRISE INTELLIGENCE LAB

ENTERPRISE INTELLIGENCE LAB

Enterprise Digital Brain

Framework brief based on the current flagship framework portfolio and Enterprise Intelligence Lab positioning.

Framework | Version 1.0

A core platform architecture derived from the current Enterprise Intelligence Lab solution support, workflow intelligence and enterprise data products should work together.

Executive summary

A conceptual and architectural model for how institutional memory, decision support, workflow intelligence, and enterprise data products should work together.

Overview

A reference model for enterprise memory, reasoning, and decision intelligence.

Problem solved

Organizations struggle to connect fragmented data, institutional knowledge, and decision workflows into a usable intelligence layer. The Digital Brain model turns that fragmentation into a coherent architecture.

Tags

Knowledge Systems, Decision Support, Enterprise Memory

Business outcomes

- Improves cross-functional decision support and knowledge reuse
- Accelerates access to institutional memory and enterprise context
- Strengthens strategic responsiveness without losing governance control

Implementation approach

- Model enterprise memory, decision nodes, and knowledge flows
- Connect workflows to data, documents, and reasoning services
- Instrument the architecture with monitoring, review, and trust layers

Industry relevance

Life Sciences, Retail, Industrial, Telecommunications

Reference architecture model

The framework diagram below reflects the current public framework model on the site and shows the conceptual layers and signals associated with this asset.

Element	Content
Core	Digital Brain
Layers	Signals & Data, Knowledge Memory, Decision Services, Execution Workflows
Signals	Context, Memory, Reasoning

Open Source	IntelGraph Starter Kit

Positioning note

This document is an Enterprise Intelligence Lab branded framework brief. It uses the current flagship framework copy, reference diagram elements, and enterprise positioning language already present in the site. It does not introduce fabricated case studies, customer claims, or unsupported adoption metrics.
