

ENTERPRISE INTELLIGENCE LAB

ENTERPRISE INTELLIGENCE LAB

Enterprise Intelligence Operating Model

Framework | Version 1.0

Framework brief based on the current flagship framework portfolio and Enterprise Intelligence Lab positioning.

A branded framework brief derived from the current Enterprise Intelligence Lab framework portfolio and positioning language.

A formal operating model for funding, governing, sequencing, and sustaining enterprise intelligence programs across business and technology functions.

Executive summary

A formal operating model for funding, governing, sequencing, and sustaining enterprise intelligence programs across business and technology functions.

Overview

The operating system for turning intelligence ambition into institutional execution.

Problem solved

AI initiatives often lack ownership clarity, investment logic, and repeatable review cadence. This model defines who decides, who governs, and how value is measured over time.

Tags

Ownership, Portfolio, Cadence

Business outcomes

- Clarifies accountability across executives, architecture, risk, and delivery teams
- Improves prioritization and portfolio discipline
- Creates repeatable governance and operating cadence for intelligence programs

Implementation approach

- Define capability domains and ownership structure
- Map review forums, escalation paths, and evidence requirements
- Tie delivery metrics to executive operating reviews and resource allocation

Industry relevance

Banking, Insurance, Technology, Energy

Reference architecture model

The framework diagram below reflects the current public framework model on the site and shows the conceptual layers and signals associated with this asset.

Element	Content
Core	Operating Model
Layers	Portfolio Governance, Capability Ownership, Execution Forums, Value Measurement
Signals	Funding, Escalation, Accountability
